MEMBER NATIONAL FARM & GARDEN ASSOCIATION

## *Special Message*

Your order will be filled at the proper planting time with bulbs from my own garden here at Canby and from the gardens of Mr. Edgar L. Kline, Lake Grove, Oregon, who has one of the finest selection of lilies in the world.

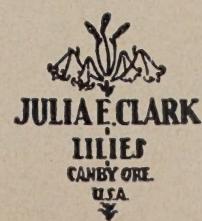

Mr. Kline is turning all his retail orders to me this year, to be filled by me at my own warehouse. This saves double advertising, shipping and office expense, and guarantees you excellent bulbs of many more varieties of lilies than I have been able to offer you before.

There is still a limited number of bulbs of some of these varieties, but if you will place your order early, with this combined effort, your chance to receive any number within reason, is excellent.

## To Bloom in your Garden

*{With all Costs of Delivery}*

### PLEASE READ THIS

Every bulb I sell is grown on the western coast.

All shipments in the U. S. are prepaid to destination. If your express office is different from your postal station, kindly give both with your order.

I ship bulbs at the proper planting time. Sometimes this necessitates two and even three shipments to an order, which is an additional expense to me, but it guarantees you fresh bulbs. Candidum and Testaceum are dormant in late July or early August, according to the season. Please place your orders early—we ship in August. The Fritillarias are best moved quite early—they should be planted in July or early August. Notholirion Thompsonianum should be planted early. We ship August-September. All other early flowering lilies will be shipped during October-November. Late flowering during November. According to our season. If you will be away from home, please leave instructions for some one to plant them upon arrival, as they should not be out of the ground longer than possible.

With the exception of Giganteum Hym. and Cordatum, every bulb I offer, even "flowering size", has already bloomed or budded to bloom.

I am an advocate of fall planting of lily bulbs—I do not keep bulbs in cold storage, nor is it possible for me to mail a spring catalogue—bulbs begin growing here too early.

I do not sell wholesale as I have all I can do to take care of my retail orders.

Plant your lily bulbs upon arrival—it is so important for the sake of the future of the lily that it does not lie out of the ground long.

I have tried to give you an attractive catalogue, but in so doing to also be truthful in all my statements and descriptions, according to my experience with them. My greatest desire has been to grow or secure for you in this vicinity, the very best bulbs possible.

With additional varieties from the gardens of Mr. E. L. Kline, you should be able to find many beautiful lilies for your garden while these times necessitates our remaining at home.

# 138 VARIETIES

{many New Varieties}

## from May until October

(Delivery in U. S. Postpaid)

GIGANTEUM  
HIMALAICUM

However, I cannot guarantee them to grow in your garden, as your climate or your soil may not be suited to every variety I list, but I'm sure some of these varieties can be a success in your garden, and they are worth your trying. I guarantee all bulbs to reach you in good healthy condition. If there is any complaint, please make same upon receipt of shipment.

Please do not ask me to make shipments of any order for less than \$2.50.

Please note the number of beautiful hybrids I am listing this year.

For those with large estates, I am again offering the following:

If your order amounts to \$100.00, you may deduct 5%.

If your order amounts to \$200.00, you may deduct 10%.

If your order amounts to \$300.00, you may deduct 15%.

General rules of culture will be sent with each shipment. We ship bulbs at proper planting time.

My bulbs are shipped from Maine to California, so no **definite** rules for each location can be given, but under each variety listed in this catalogue is given the description, the normal height, date of bloom, and depth to plant. You will need to adjust these general rules to your locality.

# LILIES

I will pay delivery on all orders in U. S. of \$2.50 and over. For less than \$2.50, please add 25 cents. This is for extra expense in handling and delivery.

Unless an established customer, please send cash with your order.

*Where price of a single bulb is given, 3 bulbs will be 3 times the single bulb. Where 6 bulbs is the lowest listed, price of 3 will be 1/2 of 6, or 1 bulb will be 1/6 of 6; 50 bulbs will be 1/2 of 100. First size refers to bulbs large for that variety.*

**AURATUM (Gold Band)**—These Auratum bulbs are grown from seed. Large white bowl-shaped flowers with a central band of gold, and sweetly scented. Not a diseased bulb has been found in the whole planting. Plant 8 to 10 inches in ordinary, well drained soil of deep leafmold. Soluble limestone is fatal to it and too much shade. Under favorable conditions, it will attain a height of 5 to 8 feet. Blooms August-September.

	Each	6	12	25	100
5-6 in. cir.	\$ .70	\$4.00	\$7.70	\$15.00	\$58.80

7-8 in. cir.	1.00	5.50	10.70	21.00	82.80

**AURATUM pictum**—This is another Gold Band. In this variety the flower is heavily spotted with crimson, and the tip of the gold band crimson flushed.

	Each	6	12	25	
Flowering size		\$1.50	\$8.00	\$15.70	\$31.00

**AMABILE**—This lily is **early blooming**, and for that reason alone is quite valuable for your garden and rockery. Its blossoms are waxy, bright orange scarlet. Height 1 to 2 ft. Blooms early June. Plant 4 inches deep in an open sunny location.

	6	12	25	100
3-4 in. cir.	\$1.50	\$2.70	\$5.00	\$18.80
4 in. up	1.90	3.50	6.60	25.20

**AMABILE Luteum**—A distinct variety of Amabile with attractive clear orange-yellow flowers similar to the type except in color. A rare form. Same culture as for Amabile.

	6	12	25	100
Flowering size bulbs	\$4.00	\$7.70	\$15.00	\$58.80

**AZALEA**—This is a new hybrid—a cross between Philadelphicum and Dauricum, with many apricot colored, cup-shaped flowers, on stems 2 to 2½ feet tall. Blooms early and can be used either as specimen or mass planting. Plant 4-5 inches deep in a sunny location. May to June.

	Each	6	12	25	100
Flowering size	\$ .75	\$4.00	\$7.70	\$15.00	\$58.80

**BAKERIANUM**—Creamy white pendulous bell-shaped flowers richly spotted red purple at the throat. Prefers a rather moist sheltered position. Height 3 ft., blooms July. Plant 4 to 6 in. deep with sharp drainage. The distinctiveness of this lily is that it is so very different.

Each      6      12  
Flowering size . . . . \$1.75    \$9.00    \$17.50

**MRS. R. O. BACKHOUSE** (Hybrid)—A very strong growing hybrid lily named after its originator, Mrs. R. O. Backhouse. A cross between *L. Martagon* and *L. Hansonii*, this lily is extremely floriferous — well grown specimens carrying from 20 to 30 recurved flowers on stems 5-6 feet tall. The color is orange yellow, lightly spotted purple on the interior and suffused with a lavender shade on the outside of the petals. Plant 6-8 inches deep in partial shade. Blooming period June-July. Stock limited.

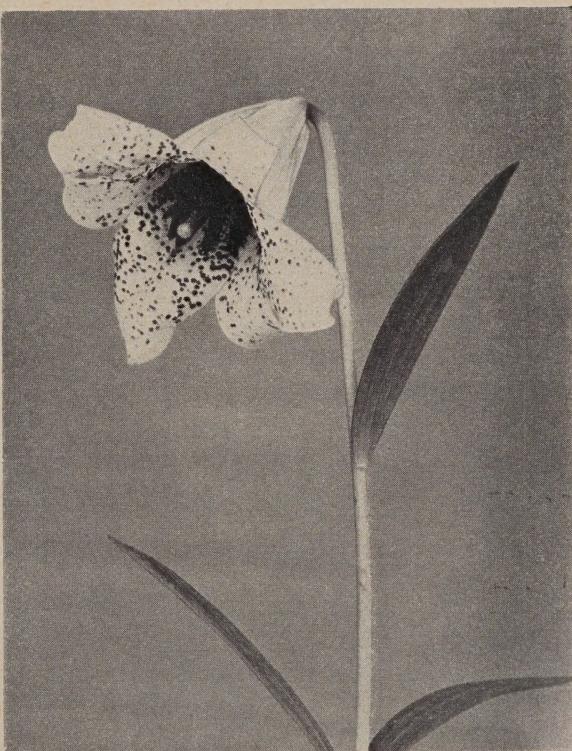

Each      3  
Flowering size . . . . \$3.65    \$10.50

**BRENDA WATTS**—Same parentage as Grace Marshall, a particularly vigorous grower and rapid propagator. A handsome plant growing to a height of 4 to 5 ft. The flowers are fire-red, dotted purple towards center. This is an attractive, showy lily. Plant 6-8 inches deep in sun or partial shade and a well prepared soil.

Each      3  
Flowering size . . . . \$1.65    \$4.50  
Large bulbs . . . . . 2.65    7.50

AURATUM (Gold Band). White dotted and central band of gold. See opposite page.

BAKERIANUM. Creamy white, richly spotted red-purple at the throat.

CANADENSE FLAVUM. Clear golden yellow, chocolate spotted.  
See opposite page.

**BROCADE** (Hybrid)—One of the most vigorous of the Martagon x Hansonii hybrid group produced by Mrs. R. O. Backhouse. On opening the martagon type flowers are light fuchsia purple shading to light lemon yellow at the base with deep purple spots. As the flowers age they become light orange yellow and the purple coloring recedes to the tips. Very hardy and disease resistant. Height, 4 to 5 feet. Plant 6 inches deep in partial shade. June-July flowering. Stock limited.

	Each	3
Selected bulbs . . . . .	\$3.65	\$10.50

**BURBANKII**—This is a Burbank hybrid. The blooms are large, fragrant and numerous, usually horizontal, orange-yellow with profuse chocolate spots and reddish tips, the segments recurving gracefully and the stamens projecting conspicuously. Grows from 4 to 5 ft. Blooms July. Plant 4-5 inches deep, partial shade, good drainage. Keep moist during growing season. Like its parents, Parryi, Pardalinum and Washingtonianum, it needs to be established a season or two to see it at its best. Stock limited.

	Each	3
	\$1.65	\$4.50

**CALLOSUM**—Callosum has a slender wiry stalk, bearing 10 to 20 recurved blossoms of an interesting shade of light salmon. This little lily isn't as outstanding as the larger lilies, but it is very dainty, and its numerous blossoms will blend with any flower in your garden. Height 2 to 3 ft. Blooms late July-August. Plant 4-6 inches deep in full sun. It will endure lime.

6	12	25	100
\$1.50	\$2.70	\$5.00	\$18.80

**CANADENSE**—One of the best of the Northeastern American lilies. Graceful bell shaped flowers on tall stems; easy to grow. Should be in the garden of every lily lover. Ht. 2 to 5 ft. Blooms June-July. Plant 6 to 8 inches deep.

**Var. flavum**—Clear golden yellow, chocolate spotted within.

	6	12	25	100
1st size . . . . .	\$1.60	\$2.90	\$5.40	\$20.40

**Var. rubrum**—Dark brick red, yellow throat, thickly spotted.

	6	12	25	100
1st size . . . . .	\$2.60	\$4.90	\$9.40	\$36.40

**CANDIDUM (Madonna Lily)**—Our grandmother's beloved lily—and still a favorite. Pure white, dainty, fragrant. Unlike the other lilies, Candidum starts its growth early in the fall, producing a rosette of leaves during the winter—so plant this bulb **early** in a sunny location, apart from other lilies. Plant shallow, best about 1 inch above bulb, not over 2 inches. Prefers some lime. Poor location will do, but good garden soil preferred—and then let it alone. In spring, our experience has taught us, it is best to remove these fall grown leaves—they have served their purpose, and dying, are more apt to catch and transfer the brown leaf spot to the new spring foliage. Height 3-5 ft. Blooms June. The quantity is very limited. It may be necessary to give you a size smaller than you order, but **full value** will be given you. Bulbs are shipped in late August—order early.

	6	12	25	100
6-7 in. . . . .	\$1.70	\$3.10	\$5.80	\$22.00
7-8 in. . . . .	2.30	4.30	8.20	31.60
8-9 in. . . . .	2.80	5.30	10.20	39.60
9-10 in. . . . .	3.30	6.30	12.20	47.60
10-11 in. . . . .	4.10	7.90	15.40	60.40
*11-12 in. . . . .	4.90	9.50	18.60	73.20
*12 in. up. . . . .	5.90	11.50	22.60	89.20

\*Very limited stock.

CANDIDUM. Pure white.

CENTIFOLIUM. White, abundant foliage.

**CENTIFOLIUM** (syn. L. Leucanthum var. Chloraster)—A magnificent species introduced by Reginald Farrer from stock found growing in a Chinese garden in 1914. The flowers are immense white trumpets borne on stems rising from 6 to 8 feet in height. Seed grown stocks vary somewhat in the external coloring of the flowers, some being shaded green and others brownish purple, but all are well worth growing. The name of this plant (Centifolium, "hundred-leaved") is suggestive of its abundant foliage. We are pleased to offer home-grown stock of L. Centifolium and believe it to be an exceptional addition to any lily collection. Plant 8 to 10 inches deep in light shade with perfect drainage. July - August blooming.

Each 12

4-6 in. cir. .... \$1.50 \$15.00

6-8 in. cir. .... 2.00 20.00

**CENTIFOLIUM HYBRID**—This is a cross of Regal-Centifolium-Sargentiae. It is a very fine lily. Same treatment as used for Centifolium. Stock limited.

Flowering size	Each	12	25	100
	\$2.25	\$22.50		

**CERNUUM** (China)—This is a dainty little lily from Korea, very similar in form to *Lilium Tenuifolium* except that the flowers vary from pale pink to a lilac color with deep purple spots. Excellent grown in rock gardens in sun or partial shade. Flowers are of the turks cap type and fragrant. Blooming period, June to July. Height 1½ to 3 feet. Plant 4 to 5 inches deep.

Flowering size bulbs	6	12	25	100
	\$2.00	\$3.70	\$7.00	\$26.80

**CHALCEDONICUM** (Greece)—An exceptionally fine lily commonly known as the Scarlet Martagon. The slender stems which grow from 3 to 4 feet high carry five to eight waxy, scarlet turks cap blooms. Undoubtedly one of the most brilliantly colored of all lilies. Should be planted early and requires to be established a season before it is at its best. Plant 3 to 4 inches deep in a sunny position. Blooming period, July. Stock very limited.

Flowering bulbs	Each	6	25	100
	\$2.50	\$14.50		

**CORDATUM**—A fine lily for the woodland, where it is worth cultivating for its foliage alone. In the early stages of its growth its leaves are stained a deep red, which in time changes to glossy green. Although it is distinct from *L. Giganteum* and does not grow as tall, yet it should be treated similarly, planting it in partial shade (woodland for preference), so the top of the bulb is on a level with the surface. Cover in winter with bracken or old leaves, and it is best that it become established one year before it blooms. Height 4 to 5 ft. July flowering.

	6	12	25
	\$3.60	\$6.90	\$13.40

## WHAT SEEDS DO YOU WISH?

**CONCOLOR**—This is one of the few lilies which holds its head right straight up towards the sun, and being a low grower, you can look into its bright face. I always think of it as the star lily, and love it for its glossy brilliant scarlet blooms. It takes moderate loam with leaf mold and plenty of grit and sand for good drainage with a moist root run, and out in the sun. It will endure lime, grows 12 to 18 inches, blooms June. Plant 4 inches deep.

Flowering	6	12	25	100
size . . . . .	\$1.60	\$2.90	\$5.40	\$20.40

**CONCOLOR, Dropmore variety**

—Brilliant sealing wax red flowers on stems 18 inches tall. Same culture as Concolor.

Flowering	6	12	25	100
size . . . . .	\$2.30	\$4.30	\$8.20	\$31.60

**CORONATION**—A new hybrid by Miss Isabella Preston—second generation seedling of Willmottiae x Elegans. Recurved flowers of clear bright yellow. Blooms late June, early July. Height 3-4 ft. Plant in sun or partial shade and a well prepared soil. Stock limited.

Each	3
\$5.25	\$15.00

**CROCEUM** (syn. L. Aurantiacum) (Europe)—Commonly known as the "Cottage Garden" lily and one of the easiest to grow. The stems carry as many as 20 brilliant pure orange upright flowers lightly spotted with dark orange. Will do equally well in either full sun or partial shade, although the color of the flowers stands up better with some shading. The true form of L. Croceum is often confused with strong growing types of L. Umbellatum, which are sometimes substituted. We offer bulbs of the true type. Plant 4 to 5 inches deep. Height 3 to 6 feet. Blooming period, June and July. Stock limited.

Flowering size . . . . .	Each	3
	\$1.20	\$3.45

**CYRUS GATES** (Hybrid)—This lily is one of the most brilliant and vigorous of the group known as the Bellingham hybrids, created by Dr. David Griffiths. It was named to commemorate the late Cyrus Gates, one of the donors of the land devoted to lily culture at Bellingham, Washington. The flower stems are from 5 to 6 feet tall and carry up to twenty cadmium orange recurved flowers densely spotted purple at the base. The foliage is arranged in whorls about the stem. Stocks of this fine hybrid have always been quite limited but fortunately we have sufficient bulbs available to offer it this season. July flowering. Plant 6 inches deep in partial shade and in a well drained porous soil. Stock very limited.

Flowering size . . . . .	Each	\$3.00
--------------------------	------	--------

CONCOLOR. Scarlet and red. "Looks up."

DALHANSONII. Deep mahogany red.

rising to a height of 6 feet and carrying up to 20 blossoms. Plant in a sunny situation 6 to 8 inches deep in a friable soil abundant in leaf mold. July flowering.

	6	12	25	100
Flowering bulbs . . . . .	\$2.60	\$4.90	\$9.40	\$36.40

**DAVIDI** var. **Macranthum**—Larger flowered and more robust than the type. This form is the result of years of careful selection. The blossoms are brilliant orange red, reflexed, and the plant is very floriferous, small offsets often blooming the first season. Culture as for *L. Davidi*.

	6	12	25	100
Flowering size . . . . .	\$3.10	\$5.90	\$11.40	\$44.40

**DAVIDI** var. **Oriole**—A beautiful new variety of *L. Davidi* with golden-orange flowers which was originated at the Experimental Farm in Ottawa, Canada, through the efforts of Miss Isabella Preston. Stock very limited. Similar culture to the type.

Each	3
\$2.00	\$5.50

**DAVMOTTIAE** (Hybrid)—This fine hybrid lily is the result of crossing *L. Davidi* with *L. Willmottiae* and was originally offered under the name "Ottawa hybrids", having been developed at the Experimental Farm in Ottawa, Canada. A stronger grower than *L. Willmottiae*, this plant often reaches a height of 6 feet and carries bright cinnabar-red reflexed flowers. Of easy culture when planted in sun or part shade in a well drained location. Plant 6 inches deep. July flowering.

	6	12	25	100
Flowering bulbs . . . . .	\$3.60	\$6.90	\$13.40	\$52.40

**DALHANSONII** (Hybrid)—An outstanding lily which was originally flowered in 1890 from a cross of *L. Martagon Dalmaticum* x *L. Hansonii*. The thick petaled recurved flowers are similar in form to *L. Hansonii* but the color is a deep mahogany red; an exceptional color among lilies. Foliage is similar to *L. Hansonii*. Plant 5 to 6 in. deep in partial shade and with sharp drainage. Height 4 to 5 feet. June flowering. Stock very limited.

Flowering size . . . . . Each \$4.25

**DAVIDI** (China)—A very satisfactory lily which should find a place in every collection. The flowers are reflexed, cinnabarred in color, and resemble *L. Willmottiae* in many respects. However, the plant is more erect in habit, the stems often

**DAURICUM (Improved)**—The flowers of this lily are upright, varying from light orange to deep orange, flushed and spotted red. Height 1½ to 2 feet. Blooms May-June. Plant 5 inches deep in a sunny location with good drainage.

	6	12	25	100
4-6 inches . . . . .	\$1.50	\$2.70	\$5.00	\$18.80

**DAURICUM (var. Batemanniae)**—This is an upright flowering lily of rich apricot and graceful recurving petals. Will grow in partial shade or full sunshine—does well in an ordinary garden. Height 2 ft. Blooms July-August. Plant 6 inches deep.

	6	12	25	100
4-6 in. cir. . . . .	\$2.00	\$3.70	\$7.00	\$26.80

**DAURICUM (var. Wilsonii)**—Lustrous dark green foliage and flowers of a deep apricot, spotted mahogany. It is one of the latest of these lilies to bloom, July-August.

	6	12	25	100
4-6 in. cir. . . . .	\$2.00	\$3.70	\$7.00	\$26.80

**DOUGLAS INGRAM** (Hybrid)—This hybrid lily, created by the late Dr. David Griffiths of the United States Department of Agriculture, combines the best qualities of its parents, *L. Pardalinum* and *L. Humboldtii*. The flowers, of Martagon shape, are of an orange red shading to a deeper red toward the tips of the petals and boldly spotted black. Not quite as tall as some of the other Bellingham hybrids but an outstanding and vigorous plant carrying from 12 to 20 blooms on stems 4 to 5 feet tall. July flowering. Plant 5 to 6 inches deep in partial shade and in a porous soil abundant in humus.

	6	12	25	100
4-6 in. cir. . . . .	\$4.60	\$8.90	\$17.40	\$68.40
6-8 in. cir. . . . .	6.60	12.90	25.40	100.40

**EDNA KEAN** (Hybrid)—One of the Grace Marshall-Lillian Cummings group of new hybrid lilies produced by Miss Isabella Preston at the Ottawa Experimental Farm. Similar in form to Grace Marshall but somewhat darker in coloring and not quite as tall. Of easy culture in sun or partial shade. Height, 3 to 4 feet. Plant 6 to 8 inches deep. June-July flowering. Stock limited.

	Each	3
Flowering size . . . . .	\$2.00	\$5.75

ELEGANS ALICE WILSON (left), Lemon yellow; and ATROPURPUREUM (right), Deep red shaded crimson.

**THE ELEGANS GROUP (*Thunbergianum*)**—This group of lilies has large upright cup-shaped flowers borne two to four on a stem. They are adapted to rockery and border use; are excellent for cutting and are easily grown in pots. Plant 4 to 6 inches deep, sun or partial shade, in well drained soil. This list will give you a variety in shades of lemon-yellow and apricot on through light red to the very deepest blood-red.

**Alice Wilson**—Flowers clear lemon-yellow, sparsely spotted with black. One of the best Elegans. Height 12 to 18 inches. Blooms June-July. Stock limited.

	6	12		
4-5 in. cir. ....			\$2.80	\$5.30

**Atropurpureum**—Deep red shaded crimson. Large flowers, splendid for bedding. Height 12 to 15 inches. Blooms June.

	6	12	25	100
4-6 in. cir. ....	\$2.00	\$3.70	\$7.00	\$26.80

**George Joerg**—A very free flowering variety carrying large brilliant orange-red flowers on 1-foot stems. Valuable for bedding or cutting. June flowering.

	6	12	25	100
4-6 in. cir. ....	\$2.10	\$3.90	\$7.40	\$28.40

**Incomparable**—A dwarf variety with large deep mahogany crimson flowers. June-July.

	6	12	25	100
4-6 in. cir. ....	\$1.80	\$3.30	\$6.20	\$23.60

**Kinbusen**—Orange in middle and orange-red towards edge. Height 12 to 18 in.

	6	12	25	100
4-5 in. cir. ....	\$2.10	\$3.90	\$7.40	\$28.40

**Elegans Mahogany**—Deep mahogany crimson flowers carried on 15-inch stems. One of the best varieties. June flowering.

	6	12	25	100
4-5 in. cir. ....	\$2.00	\$3.70	\$7.00	\$26.80

**Red Improved**—This variety of Elegans is light red—a terra-cotta red. It is also tall growing for an Elegans, about 2 feet. Blooms June-July.

	6	12	25	100
4-6 in. cir. ....	\$1.60	\$2.90	\$5.40	\$20.40

**FORMOSANUM GROUP**—Originally listed as *Philippinense*. A very fine trumpet lily—flowers pure white with emerald-green throat, shaded externally with violet. It is slender, graceful, dainty, fragrant. Plant 5-6 inches deep in well drained lime free soil, rich in leaf mold. A warm sunny situation suits it best. Makes a small bulb for the size of the plant. This year I can give you three varieties of this lily.

**Early Variety** (Price's)—A very hardy low growing form rarely more than one foot high. It is an excellent lily for your rockery, providing it is not too dry and windy—and is fine for the front of your border. Blooms July-August.

	6	12	25	100
<b>Size 2-3 in. cir. (small bulbs)</b>	\$1.10	\$1.90	\$3.40	\$12.40
<b>3-4 in. cir.</b>	1.60	2.90	5.40	20.40
<b>4-5 in. cir.</b>	2.10	3.90	7.40	28.40
<b>5 in. up</b>	2.60	4.90	9.49	36.40

**Intermediate Variety**—This form is considerably taller than the early variety and flowers a week or two later. It is especially recommended for Northern gardens where weather conditions do not permit growing the late variety to perfection.

	6	12	25	100
<b>Small bulbs, size 2-3 in. cir.</b>	\$1.20	\$2.10	\$3.80	\$14.00

**Late Variety** (Wilson's)—A superior form of the trumpet lily which is fast becoming one of our most popular species. Bears up to eight flowers on stems 4 to 6 feet tall. Fragrant. One of the latest to flower, blooming from September to October. It is especially recommended for southern gardens, where there is no early frost, as this variety is a very late bloomer.

	6	12	25	100
<b>Size 2-3 in. cir. (small bulbs)</b>	\$1.10	\$1.90	\$3.40	\$12.40
<b>Size 3-4 in. cir.</b>	1.60	2.90	5.40	20.40

**FIRE KING** (Hybrid)—One of the most brilliant and handsome hybrid lilies of recent introduction. This plant is the result of crossing *L. Willerovidii* with a form of *L. Umbellatum*. The large fiery red recurved flowers are held horizontally to the sturdy stems which reach a height of from 3 to 4 feet. Mature bulbs will carry up to 30 flowers of exceptional substance and keeping quality. Plant 4 to 5 inches deep in sun or partial shade. Late June flowering. Stock very limited.

	Each	3
<b>Flowering bulbs</b>	\$5.50	\$15.50

FIRE KING. Fiery red. See page 13.

GRAYI. Orange red densely spotted with brownish purple.

**GRACE MARSHALL**—(Crossing Willmottiae with a seedling of Elegans x L. Dauricum.) The deep red reflexed flowers are held more horizontally to the stem than in Willmottiae and the plant carries from 20 to 30 blossoms. The stems are erect, 4 to 5 ft. tall, and have no wandering habit. Plant 6 to 8 inches deep in sun or partial shade and a well prepared soil.

Flowering size .....	Each \$1.75
Large size .....	Each 2.60

**GLOW**—This is another hybrid—Philadelphicum X Dauricum—the blooms are larger and the foliage heavier than the parentage. Cup shaped flowers of a deep glowing reddish orange. Early bloomer. May-June. Plant 4-5 in. deep. Sunny location.

Flowering size .....	6	12	25	100
	\$4.20	\$8.10	\$15.80	\$62.00

**GRAYI**—This is a native lily of Virginia and North Carolina. Somewhat resembles Canadense but with smaller funnel shaped orange-red blossoms densely spotted with brownish-purple. Blooms July. Plant 4 inches deep in a well drained soil, partial shade or full sunshine. Height 2 to 4 ft. The bulbs I am shipping are grown in Oregon nurseries.

First size .....	6	12	25	100
	\$2.40	\$4.50	\$8.60	\$33.20

**GUINEA GOLD** (Hybrid)—A new introduction by Mr. F. L. Skinner obtained by crossing L. Hansonii and L. Martagon. This very attractive plant carries a number of yellow recurved flowers which are thickly spotted brown. The buds are pink, offering a pleasing contrast to the open flowers. Of easy culture and best grown in partial shade. Plant 6 inches deep. Height, 3 to 4 feet. June-July flowering. Stock limited.

Flowering size .....	Each \$2.75
----------------------	-------------

HANSONII. Golden color with mahogany spots

HENRYI. Golden yellow with tinge of light green through center.

**HANSONII**—Of all the lilies this is probably one of the hardiest and most disease proof lilies in existence, doing well in almost any position, and any soil, even with lime—and it is long lived. Like all the other lilies, however, it repays you for good leafmold. The longer I grow it, the better I like these thick petaled golden nodding flowers in my garden. It is at its best in even more than half shade for its flowers. Height 3-4 ft. Blooms June. Plant 6-8 in. deep.

	6	12	25	100
5-6 in. cir. ....	\$2.80	\$5.30	\$10.20	\$39.60
6-7 in. cir. ....	3.30	6.30	12.20	47.60
7-8 in. cir. ....	3.80	7.30	14.20	55.60

**HENRYI (The Golden Speciosum)**—The blossoms of this lily are a soft golden yellow with a tinge of light green through the center. It is excellent for bouquets, opens readily in water from the largest to the tiniest bud, loves shade to intensify the golden yellow, and is not disturbed by mice. Your garden is not complete without a few Henryi. Height 5 to 9 ft. Blooms August-September. Plant 8 to 10 in. deep.

	6	12	25	100
5-6 in. cir. ....	\$1.20	\$2.10	\$3.80	\$14.00
6-7 in. cir. ....	1.40	2.50	4.60	17.20
7-8 in. cir. ....	1.80	3.30	6.20	23.60
8-9 in. cir. ....	2.10	3.90	7.40	28.40

I have a very limited supply of larger sizes but not enough to list in quantity.

GIGANTEUM HIMALAICUM. Pure white, tinged purple inside.

**GIGANTEUM HIMALAICUM**—A giant among lilies. Under ordinarily favorable conditions, the spikes have grown 10 to 12 ft. The foliage is broad and dense in keeping with the height of the plant. The many flowers are tubular shaped, pure white tinged with purple inside and it loves the rich humus soil of a woodland where it will have plenty of shade away from the direct rays of the sun. A northern exposure protected from strong winds, or the shade of trees will suit it. It does not do well in the open border. After flowering this lily perpetuates itself by producing offsets, which should be lifted and replanted. Plant shallow, barely covering the top of the bulb with soil. June blooming.

	Each
Mammoth flowering size bulbs . . . . .	\$3.50
Large bulbs to flower second summer . . . . .	2.50
Smaller bulbs to flower third summer . . . . .	1.50

It is extremely difficult to be sure of the exact year of the blooming of these bulbs, so I recommend the purchase of one or more bulbs of each size to provide an annual display. Cycles of three bulbs (one of each size) are offered at \$7.00.

**FORMOSANUM** (Late Variety). White, emerald-green throat.  
See page 13.

**KULSHAN** (Hybrid)—A new hybrid lily introduced through the efforts of the late Dr. David Griffiths. This Humboldtii x Pardalinum cross is named after one of the mountains of the Bellingham, Washington, region. The plants carry spikes 5 to 6 feet high with 10 to 20 cadmium orange flowers densely spotted black. A fine garden lily having many of the best attributes of its parents. Plant 5 to 6 inches deep in partial shade. Flowering period, early July.

	6	12	25
4-6 in. cir. . . . .	\$4.70	\$ 9.10	\$17.80
6-8 in. cir. . . . .	6.60	12.90	25.40

**LONGIFLORUM**—I offer three varieties of this well known Easter Lily, which can be grown in your garden, if your region isn't too cold. Plant 8-10 inches deep in well drained situation. All are excellent home grown bulbs.

**Giganteum**—The most popular form for Easter decoration and also a fine plant in the garden. Will carry from 6 to 10 large flowers of great substance. July flowering. Height 2 to 3 feet.

	6	12	25	100
8-9 in. cir. . . . .	\$5.60	\$10.90	\$21.40	\$84.40

**Snow Drift**—An excellent newly introduced strain from Mr. A. T. Jeremy, Castle Hail, New South Wales, Australia. According to the originator's description, Longiflorum "Snow Drift" is most floriferous, individual blooms measuring to 7 inches across. Petals are wide and round with well defined rib ridges. Perfume of main parent stock has touch of magnolia scent. Height, from 4 to over 6 feet.

	6	12	25	100
Flowering size . . . . .	\$3.70	\$7.10	\$13.80	\$54.00

"THE ESTATE LILY." Pure white.

**LONGIFLORUM "ESTATE LILY"**—This is a beautiful display lily for your garden, proves hardy wherever the Easter Lily can grow, but gives you much larger flowers, more of them, and taller, stronger stems than the Easter Lily. Originally propagated in the Southern Oregon coastal region, this lily far outstrips all other varieties in size and substance of flower, stature and ease of culture. Grown in a carefully segregated situation, stock of "The Estate Lily" can be offered as definitely virus free. As it is being propagated outdoors in Oregon it should also prove to be a fine garden lily except where extreme frost is encountered. For outdoor culture plant 8 to 10 inches deep in a sunny well drained situation.

#### Forcing Instructions

Under glass the "Estate Lily" sends up strong 5-ft. stems, which carry from 3 to 8 immense white trumpet lilies, which are fully 50% larger than the regular Easter Lily, and the flowers are longer lasting. This is a wonderful display lily for springtime bloom in private greenhouses and for weddings and church. Only a very few plants are required for an excellent display.

Use a 7-inch pot for one bulb of 7-9 in. cir. and a 10-inch pot for three of them.

Use an 8-inch pot for one bulb of 9-11 inches.

Pot during November or early December and heel pots into some protected location, cold frame is fine, where they will not freeze. Move to greenhouse of 55 to 60 degrees at night, about first week in January, where they require approximately 120 days. The bulbs should be kept moderately moist but not over-watered.

	Each	6	12	25	50
7-8 in. cir.	\$1.00	\$5.20	\$10.00	\$19.80	\$39.20

10-11 in. cir.	1.35	6.90	13.50	26.60	52.80

**LILLIAN CUMMINGS**—(Cross between Willmottiae and Dauricum.) Large reflexed flowers of light orange red with flowers held more horizontally than the usual Martagon type flower. Very vigorous. Height 4-5 ft. Plant sun or partial shade, 6 to 8 inches deep. July flowering.

	Each	3
Flowering size bulbs . . . . .	\$1.00	\$2.80
Large bulbs . . . . .	2.00	5.70

**LYLA McCANN**—(Same parentage as Graee Marshall.) The flowers are a bright golden orange, and, as with Graee Marshall, the same habit of wandering has been overcome. Height 3-4 ft. Plant 6 to 8 inches deep, sun or partial shade.

	Each	12
Flowering size bulbs . . . . .	\$1.50	\$15.00
Large size bulbs . . . . .	2.50	25.00

**MARHAN Ellen Willmott** (Hybrid)—An exceedingly fine hybrid between L. Martagon and L. Hansonii which is very reliable and vigorous. The thick petaled flowers are buttercup yellow shaded light brown with mahogany spots and the foliage is borne in whorls as in L. Hansonii. Height 4 to 6 feet. Plant 6 inches deep in partial shade. Blooming period June to July. Stock limited.

Each . . . . .		\$3.50
----------------	--	--------

**MARHAN H. J. Elwes** (Hybrid)—A rare form of L. Marhan with large saffron yellow flowers suffused with light saturn red on the exterior and with mahogany shading and spots on the interior of the petals. A valuable addition to any collection. Same culture as Marhan Ellen Willmott. Limited stock.

Each . . . . .		\$4.50
----------------	--	--------

**MAXIMOWICZII Wadai** (Wada's variety)—A distinct form of L. Maximowiczii from Manchuria with larger flowers than the type. The stems are tall, often attaining 6 feet, and the thick petaled flowers are a deep orange red spotted mahogany. A very brilliant and easily cultivated lily flowering from mid-June to early July. Produces numerous bulblets on its underground stem. Plant 6-8 inches deep. Height 4-6 feet. Blooms Aug.-Sept.

	6	12	25	100
4-6 in. cir. . . . .	\$2.10	\$3.90	\$7.40	\$28.40
6 in. up . . . . .	2.60	4.90	9.40	36.40

**MAXWILL**—This is a hybrid lily—a cross between Willmottiae and Maximowiczii. The foliage is similar to Willmottiae, but like Maximowiczii, it grows tall. It has no running stem. It has a very strong constitution and will establish readily under ordinary garden culture. Plant 6 to 8 inches deep in sun or partial shade, in a well drained position.

	6	12	25	100
Flowering size . . . . .	\$2.60	\$4.90	\$9.40	\$36.40
Large size . . . . .	3.60	6.90	13.40	52.40

**NEPALENSE**—A rare Himalayan lily whose flowers are greenish-yellow, with throat heavily stained dark purple. It resembles Ochraceum except the flowers are more funnel shaped and the foliage is broader. Grows 2 to 3 ft. high. This is a tender lily and should be grown in the greenhouse where the ground freezes heavily. In the southern states where it will not be visited by heavy freezing, it will do well in the garden. Plant 6-8 inches deep in partial shade with sharp drainage. Limited supply.

	Each	12
Flowering size bulbs . . . . .	\$2.00	\$20.00

MARTAGON VAR. ALBUM. White.

**MARTAGON**—This is the purple Martagon—of easy culture in either sun or shade, but sometimes requires a year to establish itself. The stem carries a number of waxy light purple flowers, spotted with deep purple. Height 3-4 ft. June-July flowering. Plant 3-4 in. deep. Limited supply.

	6	12	25
3-4 in. cir. . .	\$4.50	\$8.70	\$17.00
4-5 in. cir. . .	5.50	10.70	21.00

**MARTAGON** **Album**—A dainty little turkscap white lily, with many blossoms up and down the stem, which grows 3 to 4 ft. tall. I'm glad to be able this year to secure Oregon grown bulbs of this variety for those who want a white lily in their garden. This is a lovely little lily, but the bulbs are very slow growing. Blooms June-July. Plant 4-5 in. deep. Very limited supply.

	6	12	25	50
3-4 in. . .	\$5.40	\$10.50	\$20.60	\$40.80
4-5 in. . .	6.50	12.70	25.00	

MARTAGON VAR. CATTANIAE. Deep purple,  
almost black.

**MARTAGON** **Cattaniae**—A very dark form of L. Martagon, the thick petaled flowers of which are a deep purple, almost black. This variety is very vigorous growing somewhat taller than the type. A rare and striking plant. Flowering period June-July. Same culture as Martagon Album. Stock limited.

	Each	12
Flowering size . . .	\$2.50	\$25.00

**OCHRACEUM**—This is found in Burma and an extremely scarce lily. The flowers which are large and somewhat bell-shaped, are greenish-yellow, heavily blotched and spotted on the inside with dark purple, and have a spicy fragrance. If planted in the garden, it should be in a climate where the ground does not freeze heavily, or potted and plunged in the garden where it can be removed to a cool greenhouse before freezing weather. Usual height 2 to 4 ft. Plant in a partially shaded, sheltered position 6 to 8 inches deep. Flowers Aug. to Sept. and becomes dormant for delivery Nov.-Dec.

	Each	12
6 in. cir. up.....	\$2.25	\$22.50
(Supply limited.)		

**OCHRACEUM.** Greenish yellow heavily blotched inside with purple.

**PHILADELPHICUM**—This lily grows in the northeastern states and Canada. It is brilliantly colored with scarlet, center yellow, dotted maroon, cup-shaped flowers. It should be planted in a woodland, partly shady, good drainage—some protection from heavy winter rains. Flowers June-July. Plant 5 in. deep. These bulbs are grown here in Oregon nurseries.

	6	12	25	100
First size bulbs .....	\$1.80	\$3.30	\$6.20	\$23.60

**PHILADA**—(Cross between Philadelphicum and Dauricum.) A Dropmore hybrid of the native prairie. This lily has heavily spotted orange-red flowers in early June, and is excellent for your rockery, as it is low growing, from 15 to 18 inches. Plant 5 to 6 inches deep in full sun or partial shade.

	6	12	25	50
Flowering size bulbs .....	\$2.60	\$4.90	\$9.40	\$18.40

**PHILDAURICUM**—Another Dropmore hybrid with same parentage as Philada. It has a terminal cluster of upright, cup-shaped flowers of deep orange red, stained purple towards base of petals, and spotted brown. Another good rockery lily. Height 15 to 18 inches. Blooms in June. Plant 5 to 6 inches deep in sun or partial shade.

	6	12	25	50
Flowering size bulbs .....	\$3.00	\$5.70	\$11.00	\$21.60

**PHYLLIS COX**—Another brilliantly colored hybrid—the flowers are a brilliant orange red deepening toward the tips. Extremely vigorous, producing large heads of recurved flowers. Grows 3 to 4 feet. Plant sun or partial shade 6 to 8 inches deep.

	Each	12
Flowering size .....	\$1.50	\$15.00
Large size .....	2.50	25.00

**NEPALENSE.** Greenish yellow, throat stained dark purple. See page 19.

**POMPONIUM** — Closely allied to Chaledonicum but blooms earlier. This is a brilliant sealing-wax red turkscap lily and grows 3-4 ft. high, growing easily in a well drained, sunny location. Blooms June. Plant 5 inches deep. Early to late fall delivery. Supply limited.

Each	12
Flowering size . . . . .	\$1.00 \$10.00

**PYRENAICUM** (Pyrenees) — Often referred to as the yellow Turk's Cap, this lily is one of the earliest to flower. The flowers, of Martagon type, are yellow spotted black and are carried on stems which will reach 4 feet when well established. Seems best in partial shade and needs a season to establish itself. Plant 5 inches deep. May-June flowering.

Flowering	6	12	25	100
size . . . . .	\$4.70	\$9.10	\$17.80	\$70.00

**PRINCEPS, G. C. Creelman** (Hybrid)—True. This is undoubtedly one of the finest of the Regale x Sargentiae hybrids now in commerce. The plant produces extraordinary heads of trumpet shaped flowers in late July, somewhat after L. Regale has finished blooming. The flowers, of great substance, are white with lemon-yellow center shaded brownish lavender on the exterior. When well established will grow from 6 to 8 feet tall and carry as many as 30 trumpets. Plant 8 inches deep in sun or partial shade. Stock limited.

Selected flowering bulbs . . . . .	Each	3
	\$2.50	\$7.25

**PRINCEPS, G. C. Creelman x Centifolium Hybrids**—A grand new strain of trumpet lilies for which we are indebted to Miss Beatrice L. Palmer of Cobble Hill, B. C., Canada. These remarkably robust lilies produce immense heads of flowers, white with lemon yellow throat suffused externally as in the parent plants. Flowering period, late July. Culture same as L. Princeps G. C. Creelman.

Large select bulbs . . . . .	Each	3
	\$2.75	\$8.00

**PRINCEPS, Shelburne Hybrid**—This hybrid lily is of the same parentage as G.C. Creelman. It is a very attractive plant of tall, slender growth blooming later than L. Regale and with flowers of the Regale-Sargentiae type. Sometimes produces bulbils in the leaf axils. Same culture as Princeps G. C. Creelman. Height 5 to 6 feet.

Strong flowering bulbs . . . . .	Each	12
	\$ .50	\$5.00

RUBELLUM. Light pink.

**REGALE (The Regal Lily)**—If you haven't planted this lily in your garden, your garden is missing a very beautiful flower, and if you have a FEW of them in your garden, why not plant more? This is easily the most popular lily that grows. Large white bell-shaped flowers with deep golden throat and pink midribs. Blooms June-July. Height 3 to 8 ft. Plant 6 to 8 in. I have very fine firm bulbs with excellent roots, and this price is delivery prepaid.

	6	12	25	100
5-6 in. cir. ....	\$ .85	\$2.00	\$3.75	\$13.20

11-12 in. cir. ....	4.15	8.00	15.75	58.75

**REGALE, High Crown Type**—A distinctly different strain of L. Regale which is of more uniform height and blooming time than the usual seedlings offered. The blossoms are evenly spaced on the stem to produce a high crown of flowers.

	6	12	25	100
7-8 in. cir. ....	\$1.50	\$2.70	\$5.00	\$18.80
8-9 in. cir. ....	2.00	3.70	7.00	26.80

**RUBELLUM**—A very lovely light pink trumpet shaped lily, fragrant and very early blooming. A splendid lily for rock gardens and cool greenhouse. It prefers considerable shade. Height 12-18 in. Blooms May-June. Plant 4 to 6 in. deep.

	6	12	25	100
Medium flowering bulbs .....	\$3.00	\$5.75	\$11.00	\$42.80

PHILADELPHICUM. Scarlet; center yellow, dotted maroon. See page 21.

**SACAJAWEA** (Hybrid)—This fine hybrid lily was selected by Dr. David Griffiths and is of the same parentage as *L. Shuksan*, namely *L. Humboldtii* x *L. Pardalinum*. In keeping with the other lilies introduced by Dr. Griffiths, this plant is named after the Indian guide of Lewis and Clark on their expedition into the Northwest. Attaining a height of from 5 to 6 feet, *L. Sacajawea* carries large reflexed flowers deep orange-yellow in color with black spots, the stem admirably enhanced by the lustrous foliage which is arranged in whorls. Plant in sun or part shade at a depth of 6 inches. A porous soil abundant in peat or leaf mold suits it best and good drainage is essential. July flowering.

	Each	12	
6-8 in. cir. . . . .	\$1.60	\$16.00	

**SARGENTIAE** (China)—A handsome, large flowered trumpet lily. The large white flowers are suffused with brown externally and the base of the throat is golden yellow. Forms bulbils in the axils of the leaves by which it may be propagated. Bears up to 15 flowers during late July and early August. Plant 8 to 10 inches deep in full sun but with a ground cover of low shrubs. Height 4 to 5 feet.

	6	12	25	100
Flowering bulbs . . . . .	\$5.60	\$10.90	\$21.40	\$84.40

**SCEPTRE** (Hybrid)—This lily is one of the fine group of hybrids raised by Mrs. R. O. Backhouse from crosses of *L. Martagon* and *L. Hansonii*. The reflexed flowers are light lemon yellow suffused with light fuchsia purple at the tips of the petals and with deep purple spots. The stems reach a height of 4 to 6 feet when well established. In our opinion this is one of the best of the Backhouse hybrid series. Plant 6 to 8 inches deep in partial shade. June-July flowering. Stock limited.

Flowering size bulbs . . . . .	Each \$5.50
--------------------------------	-------------

**SKINNER'S ORANGE**—This lily produces erect, broad petaled flowers of a bright orange, deepening slightly at the tips, and spotted browns. Grows about 2 feet. Flowers in June. Plant in sun or partial shade 4 to 5 inches deep.

Flowering	6	12	25
size . . . . .	\$4.10	\$7.90	\$15.40

**SCOTTIAE** — (Cross between Willmottiae and Elegans Mahogany.) Flowers are a bright salmon orange spotted purple—a fine garden lily of easy culture. Height 2-3 ft. Plant 5-6 inches deep, sun or partial shade.

**Dark form** — Early blooming — June.

6	12	25	
Flowering size . . .	\$6.60	\$12.90	\$25.40

**Light form** — Late blooming — July-August.

6-8 in. cir. ....		6.70	13.10	25.80

**SULPHUR-GALE** (Hybrid) — A hybrid lily resulting from the crossing of L. Sulphureum and L. Regale which flowered first in Europe in 1916. As with many hybrids, this plant is somewhat variable but the flowers are similar in type to L. Regale, but taking on a more creamy tint. This hybrid blooms later than Regale and is useful in extending the flowering period of that fine lily. Plant 8 to 10 inches deep in full sun or partial shade. Height 4 to 5 feet. Flowering period, July.

	6	12	25	50
6-8 in. size ....	\$2.70	\$5.10	\$9.80	\$19.20

**SULPHUREUM** (syn. *Myriophyllum superbum*) (Burma)—Easily one of the most beautiful trumpet lilies ever introduced. Buds of this lily often measure 11 inches in length and the fragrant flowers upon opening are a pale sulphur yellow deepening in color at the throat. The exterior is tinged with claret red. Should be planted in full sun in a protected southerly exposure. You really should have it in your garden. It has large sulphur-yellow blossoms, blooms late in the season when we need a trumpet lily, and is daintily fragrant. In severe climates, Sulphureum should be protected with a heavy mulch. It grows 4 to 5 ft. Blooms Aug.-Sept. Plant 8 to 10 in. deep. I can give you good fresh Oregon grown bulbs. Supply very limited—orders taken subject to stock.

	Each	6	12
6-7 in. cir. ....	\$1.25	\$6.75	\$12.50
7-8 in. cir. ....	1.50	8.25	15.00

9-10 in. cir. ....	2.15	11.00	21.50

**THE SPECIOSUM GROUP** — I am offering you four varieties of Speciosum this year, to give you September blooming, and I wish my customers would plant all the varieties along with Henryi (which I call the Golden Speciosum) in the background, as a group planting. The name in latin means "good looking, showy, splendid, brilliant." I'm sure you'd love them. The bulbs I will ship you are all Oregon grown and are nice firm bulbs with roots. They grow 3 to 5 ft. Bloom September. Plant 6-10 in. deep in rich garden soil with deep leafmold, well drained.

**Album** (Kraetzeri form)—This is the pure white form of Speciosum, fragrant and very dainty. I consider it one of the most beautiful white lilies we have.

	6	12	25	100
5-6 in cir.	\$2.60	\$4.90	\$ 9.40	\$36.40
6-7 in. cir.	3.10	5.90	11.40	44.40
7-8 in. cir (stock limited)	3.70	7.10	13.80	54.00

**Album** (Dutch form)—Larger flowered than var. Kraetzeri but lower growing. The flowers are pure white inside but often suffused with rose on the exterior.

	6	12	25	100
6-7 in. size	\$3.20	\$6.10	\$11.80	\$46.00

**Punctatum**—The earliest flowering variety, carrying large white flowers spotted rose pink. A vigorous lily, somewhat taller than Rubrum and with foliage similar to L. Auratum Platyphyllum.

	Each	12
5-7 in. size	\$ .75	\$7.50

**Rubrum**—This is the best known form of this lily—white background, numerous pink dots and shading of pink to carmine. Partial shade enhances the tone of the flowers.

	6	12	25	100
5-6 in. cir.	\$2.70	\$5.10	\$ 9.80	\$38.00
6-7 in. cir.	3.20	6.10	11.80	46.00
7-8 in. cir. (stock limited)	3.80	7.30	14.20	55.60

SPECIOSUM RUBRUM. White background, pink dots, and shading of pink to carmine.

SUNSET. Deep red, center golden with deep purple spots.

**SUNSET (Pardalinum Giganteum)**—This is a magnificent red lily. It is worth the growing for the foliage alone, and could be called a "Glorified Pardalinum". It thrives in sun or partial shade, needs good drainage, likes plenty of water during the blooming period, and as a background for other lilies, it has no superior. The clear scarlet of this lily blends well with the softer tones of the yellow in its throat. Grows 5-8 ft. high. Plant 6 to 8 inches deep.

					33.20

**SUPERBUM**—This is an Eastern American lily, but we have grown them in our fields under good cultivation, so can offer you nice bulbs. This is a tall vigorous plant with many recurring yellow blooms spotted maroon, orange and crimson. Grows 4 to 5 ft. Blooms July-August. Plant 4 in. deep, partial shade. It is a true swamp lily, growing on moist slopes, in acid meadows and marshes. In your garden give it a moist lime-free soil, partial shade and good drainage.

First size . . . . .	\$1.80	\$3.30	\$6.20	\$23.60

**SZOVITSIANUM (Caucasus)**—One of the most outstanding and beautiful of early flowering lilies, this plant is often listed by growers as a variety of *L. Monadelphum* although recently authorities have accorded it specific rank. We offer home grown stock which will overcome to a large extent the difficulty of establishing this lily under garden conditions. Produces stems 4 to 5 feet in height which carry pale yellow flowers lightly spotted deep purple. The blossoms are large and the petals recurve gracefully. Requires a season to establish, making but little growth the first year after transplanting. June flowering. Plant 5 inches deep in sun or partial shade. Stock limited.

	Each	12
Small flowering bulbs . . . . .	\$1.75	\$17.50

**TENUIFOLIUM** — "Gayest of little lilies." Bright cheery red blossoms, bringing into our gardens joy and gladness in May or early June. I am offering this again this year at a price to enable you to grow them in quantities. Height 1 to 2 feet. A fine lily for the rock garden or in the border associated with dwarf plants. Should be planted in a light sandy soil in full sun. Plant 4 to 5 inches deep. June flowering.

	6	12	25	100
2-3 in. cir..	\$1.10	\$1.90	\$3.40	\$12.40
3-4 in. cir..	1.20	2.10	3.80	14.00

TENUIFOLIUM. Bright cheery red.

**TENUIFOLIUM, Red Star** — A variation from the type first introduced about five years ago. The flowers are similar in color to L. Tenuifolium but less reflexed and with broader petals. May be a hybrid with L. Concolor. Very attractive. Culture as for L. Tenuifolium.

Flowering	6	12	25	100
size bulbs	\$1.50	\$2.70	\$5.00	\$18.80

SZOVITSIANUM. Pale yellow lightly spotted deep purple. See opposite page.

**TENUIFOLIUM, Gold Finch**—A new variety with canary yellow flowers just as easily grown as the others. Very limited supply.

Each	12
Flowering size bulbs..	\$ .75      \$7.50

TESTACEUM. Nankeen color—soft apricot or yellow buff.

	Each	6

8-9 in. cir.....	2.25	13.00
9-10 in. cir.....	2.75	16.00

**T. A. HAVEMEYER** (Hybrid)—An extremely handsome new hybrid lily produced by Mr. Tom Barry, of Lambertsville, New Jersey, by crossing *L. Sulphureum* with *L. Henryi*. The flowers are semi-trumpet shaped and measure from 5 to 7 inches across. In color they are soft buff with an external band of bright green on each segment. The interior base of the petals is deep green gradually shading to buff and cream. This plant is one of the most unusual of hybrid lilies. Height, 4 to 5 feet. Plant in part shade 6 to 8 inches deep. Stock very limited. August flowering.

Each \$5.00

**WALLICHIANUM** (Himalaya)—This lovely trumpet lily is a native of the Westren Himalayas and is quite rare in cultivation. It is best grown under glass in the north where extreme frost is encountered but can be handled outdoors in warmer climates. We have found it quite hardy here, even small seedlings being grown in the open. The flowers are creamy white and fragrant and the plant grows from 3 to 5 feet tall. For outdoor culture plant 6 to 8 inches deep in a sunny protected situation with sharp drainage. Flowering period August to September.

	Each	12
Flowering bulbs .....	\$1.65	\$16.50

**TIGRINUM Splendens**—This variety of lily has been raised by the Chinese as an article of food for over a thousand years. Doesn't that make you almost shudder when you think of the place it occupies in our gardens during August? It is a wonderful specimen lily, blooming at a time when we need its bright salmon-red and orange to tone up and cheer up the garden in late August, after the other lilies are gone and the Speciosums are not yet in bloom. If you can place this in front of green foliage, or in some corner by itself, and leave it grow for a number of years, it will well reward you. Height 4-6 ft. Plant 7-8 in. deep, sun or partial shade, well drained soil.

UMBELLATUM INCOMPARABLE. Dark red.  
See page 32.

	6	12	25	100
4-5 in. cir. ....	\$1.10	\$1.90	\$3.40	\$12.40
5-6 in. cir. ....	1.30	2.30	4.20	15.60
6-7 in. cir. ....	1.50	2.70	5.00	18.80
7-8 in. cir. ....	2.00	3.70	7.00	26.80

**TIGRINUM var. Fortunei (Korea)**—A very robust, late flowering form of the Tiger lily, which bears large salmon-orange recurved flowers on 5 to 6 foot stems. The stems are woolly and the flowers have smaller spots than var. Splendens. As with the other varieties of *L. Tigrinum*, this plant is of easiest culture in practically any location. Culture same as var. Splendens. Late August-September flowering.

	6	12	25	100
4-6 in. cir. ....	\$1.70	\$3.10	\$5.80	\$22.00

**TIGRINUM flore pleno**—This is the only double lily I have. The word "lily" seems to associate itself in our minds with a single blossom, and we sometimes resent the thought of a double lily, but I think you will find this double lily an addition to your garden, not only because it is an attractive lily in itself, but it will prolong the "reign of the Tigers" after most of the other lilies are gone. It grows 3 to 5 ft. Blooms Aug.-Sept. Flore pleno does not make as large a bulb as Splendens, so plant 5 to 6 inches deep.

	6	12	25	100
4-6 in. cir. ....	\$1.60	\$2.90	\$5.40	\$20.40

PARRYI

PHILIPPINENSE

SHUKSAN

SUPERBUM

SULPHUREUM

SUNSET

TENUIFOLIUM

**THE UMBELLATUM GROUP**—This group of lilies is extremely showy and has a wide range of color. They are not only vigorous, hardy and long lived, but are quite decorative and can be used at the front of mixed or shrub borders, or as a specimen where a good showy lily is needed. They do well in good garden soil, but better with leaf mold, in a sunny or shady location. The flower which is upright umbel shaped, ranges from early June to late July. Eventually these bulbs will send forth many stalks, and grow from 18 to 30 inches high. Plant them 4 to 6 inches deep.

**Apricot**—A stocky plant carrying umbels of bright apricot colored flowers. Very showy.

	6	12	25	100
Flowering size bulbs . . . . .	\$3.70	\$7.10	\$13.80	\$54.00

**Chief Chinook**—This is a very superior Umbellatum. Dr. Griffiths gave it to an Indian woman a few years ago with the request that she grow a supply for the market. The woman died, but the bulbs have been grown on by others. The large flowers are a clear, rich orange yellow. Stems 3 to 4 feet tall. Early blooming.

	6	12	25	100
5-6 in. cir. . . . .	\$1.70	\$3.10	\$ 5.80	\$22.00
6-7 in. cir. . . . .	2.00	3.70	7.00	26.80

9-10 in. cir. . . . .	3.50	6.70	13.00	50.80

**Erectum**—An easily grown variety carrying a number of bright red upright flowers which are shaded orange. Very satisfactory when planted in a mixed border and can be used as a pot plant for the cool greenhouse.

	6	12	25	100
5-6 in. cir. . . . .	\$1.50	\$2.70	\$5.00	\$18.80

## THE UMBELLATUM GROUP—Continued.

**Darkest of All**—A tall, very deep red form which is vigorous and free flowering. A very striking colored Umbellatum.

	3	6	12
Flowering size . . . . .	\$2.40	\$4.50	\$8.70

**Golden Fleece**—Rich golden-yellow, petals tipped with scarlet. One of the lower growing varieties. Very pretty indeed. Very limited supply.

	3	6	12
Flowering size . . . . .	\$2.45	\$4.70	\$9.10

**Incomparable**—Darker in color than Erectum but just as vigorous. The best of the medium reds.

	3	6	12
Flowering size . . . . .	\$1.00	\$1.70	\$3.10

**Orange Brilliant**—Orange shaded to crimson, faintly spotted—extremely large flowers, very robust grower.

	3	6	12	25
Flowering size . . . . .	\$2.50	\$4.60	\$8.90	\$17.40

**Orange King**—The bright orange flowers shade to deep red at the tips and are lightly spotted black. Free flowering. Supply limited.

	3	6	12	25
Flowering size . . . . .	\$1.50	\$2.60	\$4.90	\$ 9.40

**Sappho**—Flowers bright orange flushed red. Supply limited.

	3	6	12	25
Flowering size . . . . .	\$1.40	\$2.55	\$4.75	\$ 9.25

**Splendidum**—One of the latest to flower, this variety carries large vermillion flowers shaded orange. Does well in partial shade.

	3	6	12	25
Flowering size . . . . .	\$1.15	\$2.00	\$3.70	\$ 7.00

**Vermilion Brilliant**—The flowers are crimson-blood red, medium tall and quite distinct from the other varieties. One of the showiest.

	3	6	12	25
4-6 in. cir. . . . .	\$1.00	\$1.80	\$3.30	\$ 6.20

WILLMOTTIAE. Orange-yellow, tiny black dots.

**WILLMOTTIAE**—The many orange-yellow recurring blossoms of this lily are borne on a very graceful stem with long deep green foliage, and the little black dots scattered over its face enhance the yellow-orange coloring, so it seems to fairly **breathe** of life. They lend themselves beautifully to bouquets.

- Try them with delphinium in a brass bowl. Height 2 to 4 feet. July-Aug. Plant 6 inches deep.

	6	12	25	100
4-5 in. cir. ....	\$1.90	\$3.50	\$6.60	\$25.20
5-6 in. cir. ....	2.30	4.30	8.20	31.60
6-7 in. cir. ....	2.70	5.10	9.80	38.00

**WILLMOTTIAE** var. **Unicolor** (syn. *L. Sutchuenense*)—A distinct variety of *L. Willmottiae*. Flowers are lighter in color and with few, if any, spots. The foliage is grassy but the plant is more erect and the stem does not have the tendency to wander. Plant 5 to 6 inches deep in partial shade in light porous soil. Height 2 to 4 feet. July flowering.

	6	12	25	100
Flowering bulbs ....	\$2.60	\$4.90	\$9.40	\$36.40
Large bulbs ....	3.70	7.10	13.80	54.00

## Group Your Lilies . . .

★ You will enjoy your lilies more if you group them. They take up very little room, and a dozen planted 6 to 12 inches apart in a group will give a much better effect than when planted singly.

# HYBRID SEEDLINGS

The bulbs grown from seed of these hybrids do not always come true to the type. They may vary a little in color or in time of blossoming. But they are all nice lilies and good size bulbs. It will pay you to try them.

**BELLINGHAM HYBRID SEEDLINGS**—This fine race of lilies was produced through the efforts of the late Dr. David Griffiths at the Experiment Station of the United States Department of Agriculture in Bellingham, Washington. Descriptions of the named varieties, Cyrus Gates, Douglas Ingram, Kulshan, Sacajawea, Shuksan and Star of Oregon, will be found in alphabetical order in this list. In addition to these, we have on hand a stock of selected seedlings raised from seed of these named types which we are offering this season. Considerable variation will, of course, be found in these plants, the flowers ranging in color from light orange yellow to the rich orange red of *L. Pardalinum* (one of the parent plants). All of these seedlings carry reflexed flowers on stems ranging from 3 to 6 feet tall and the foliage is similar to that of the named varieties. They form an excellent strain of lilies of easy garden culture. Plant in partial shade from 5 to 6 inches deep. June to July flowering.

	6	12	25	100
4-6 in. cir.	\$2.50	\$4.70	\$ 9.00	\$34.80
6-8 in. cir.	3.50	6.70	13.00	50.80
8-10 in. cir.	5.50	10.70	21.00	82.80

**CROW'S HYBRID SEEDLINGS**—We offer selected seedlings of this magnificent strain of trumpet lilies, hybrids of *L. Sulphurea* x *L. Princeps*. These plants bloom some two weeks later than *L. Regale* and, while some variance will be noted in their coloring, all are exceptionally vigorous and beautiful. The flowers are white with greenish golden throats and orange to dark brown anthers. The exterior of the petals is shaded brown, purple or green. Well established plants will carry up to 30 flowers. Plant in sun or partial shade and 6 to 8 inches deep. Height, 4 to 6 feet.

	6	12	25	100
4-6 in. cir.	\$3.50	\$6.70	\$13.00	\$50.80
6-8 in. cir.	5.50	10.70	21.00	82.80
8-10 in. cir.	8.00	15.70	31.00	

**SEEDLINGS OF *L. PRINCEPS* G. C. CREELMAN HYBRIDS**—We offer for this season flowering stock of these seedlings which are all handsome trumpet lilies similar to the true Creelman lily but which vary in blooming period from early July to mid-August. Highly recommended for an extended flowering season.

	6	12	25
6-8 in. cir.	\$4.00	\$ 7.70	\$15.00
8-10 in. cir.	5.50	10.70	21.00

**SCOTTIAE HYBRID SEEDLINGS**—These seedlings range from light lemon yellow to deep red shades—they vary a great deal, but are very fine.

	6	12	25
	\$5.60	\$10.90	\$21.40

COLUMBIANUM INGRAMI. Golden yellow.

## THE FINEST OF OUR NATIVE WESTERN COAST LILIES

I again am offering, in a group by themselves, our western native lilies. Very favorable reports are still coming to me from many gardens as to their success with our native lilies, and everyone seemed agreed that they are worth the trial. Just how well they will make themselves at home in your garden and your locality, I cannot say, but this I do say, "they are very sweet, and worth your trying."

Give them well drained lime free soil, partial shade, and an abundance of leaf mold. Also send your orders early so they can be shipped you at the correct planting time and transplanted immediately. Delay in transplanting these bulbs even more so than some of the other lilies will cause them to mold and deteriorate. These natives are nursery grown.

**BOLANDERI**—Small bell-shaped flowers varying from a brick red to a rich wine red. Grows 1 to 3 ft. Blooms July. Plant 5 to 6 in. deep in shady position.

	Each	12	12
4-5 in. cir. ....	\$ .80	\$4.50	\$ 8.00

**COLUMBIANUM INGRAMI**—A very robust lily—bearing many small golden-yellow reflexed blossoms—slender, strong stems growing 3 to 4 feet. Blooms June-July. Plant 5 to 6 inches.

	6	12	25	100
Flowering .....	\$2.60	\$4.90	\$9.40	\$36.40

**HUMBOLDTII Magnificum**—Whether you are fond of red or white or yellow, I'm sure you'd love this lily in your garden. When established, the stem bears many flowers of a rich golden orange, with maroon dots, each dot surrounded by a crimson circle. It loves moist land on the fringe of woodlands, amongst low shrubs, with the sun peeping through. The foliage itself is very attractive. Height 4-6 ft. Blooms July. Plant 8-10 in. deep. The supply of this lily is becoming limited.

	Each	6	12
4-6 in. cir. . . . .	\$1.00	\$5.65	\$10.00
6 in. up . . . . .	1.25	7.00	12.50

**KELLOGGII**—A pinkish purple with maroon spots and a yellow stripe through the center of each petal. Petals very much reflexed. Very fragrant. Plant in partial shade in a loose woodland soil, 5-6 in. deep. Height 2-3 ft. June-July blooming.

	Each	6	12
3-4 in. cir. . . . .	\$1.00	\$5.40	\$10.00
4 in. up . . . . .	1.25	6.25	12.50

**MARITIMUM**—This dainty little woodland lily is bell shaped—deep crimson, spotted maroon. It requires moist but well drained soil, partial shade. 1 to 2 feet. Blooms July. Plant 4 inches.

	Each	6	12
4 in. up . . . . .	.85	\$4.70	\$8.50

#### **NEVADENSE var. Shastensii**—

The fragrant recurved flowers of this species are similar to *L. Pardalinum* but smaller and the plant is of more refined habit. The stems will carry as many as 20 blooms, of vivid red spotted mahogany, and the foliage is usually arranged in whorls. Of easy cultivation in a fairly light garden soil with good drainage. Plant 5 inches deep in a sunny situation. Height 3 to 4 feet. June-July flowering.

	Each	6	12
5 in. cir. up . . . . .	\$ .90	\$4.85	\$9.00

**OCCIDENTALE**—This lily is not difficult to establish under garden conditions. The flowers are bell-shaped, orange-red with a maroon spotted throat. Plant in lime free soil with peat or leaf mold. Height 2-4 feet. Blooms July. Plant 4-5 inches deep.

	Each	6	12
5 in. cir. up . . . . .	\$ .95	\$5.00	\$9.50

PARRYI. Lemon-yellow lightly dotted brown. See page 38.

**PARVUM LUTEUM.** Yellow spotted purple.

## WESTERN COAST NATIVES—

Continued.

**PARDALINUM**—A hardy lily and easy to grow. Many deep orange recurved flowers shading to crimson at tips of petals. Sun but prefers partial shade. Likes moist soil but well drained. Plant 4 to 5 inches deep. Blooms July.

	6	12	25	100
1 crown . . .	\$1.20	\$2.10	\$3.80	\$14.00
2 crown . . .	1.45	2.55	4.70	17.20

**PARDALINUM** var. **Angustifolium**—In this variety the foliage is more narrow than in the type and more abundant. A very vigorous and free flowering form. Culture same as above.

	Each	12
Single crown bulbs . . .	\$ .30	\$3.00

**PARRYI**—This is a beautiful lily; you will love it dearly. Flowers funnel shaped; petal tips gracefully recurving. Color lemon-yellow, lightly dotted brown. Requires sharp drainage, well watered, partial shade, lime free soil. Height 3 to 5 ft. Blooms July. Plant 6-8 in. deep.

	Each	6	12	25
3-4 in. cir. . . . .	\$ .75	\$4.00	\$7.50	\$14.10
4-5 in. cir. . . . .	1.00	5.65	10.00	18.85
5 in. up . . . . .	1.25	7.00	12.50	

**PARVUM LUTEUM**—Many small bell-shaped yellow flowers spotted purple. Prefers moist sandy soil with sharp drainage. Plant 4 inches deep in partial shade. Height 4 to 5 feet. Blooms June.

	Each	6	12
Flowering size . . . . .	\$ .85	\$4.70	\$8.50

**ROEZLII**—This is another turkscap lily with golden-yellow flowers shading to orange-red at the tips. As with all the other western natives, give them lime free soil, good drainage, partial shade and moisture during the growing season. Height 3-5 ft. Blooms July. Plant 4-6 in. deep.

	Each	6	12
Flowering bulbs . . . . .	\$ .60	\$3.50	\$6.00

**RUBESCENS** — A native lily which resembles *Washingtonianum* but with smaller, more erect flowers. Flowers tubular and white, passing to purple with age. Plant 6-8 inches deep in partial shade and loose, gravelly soil. Height 3 to 5 feet. June-July blooming.

	Each	6	12
5 in. up . . . . .	\$ .90	\$5.00	\$9.00

**WASHINGTONIANUM (Mt. Hood)**

This is Oregon's beloved lily — dainty, fragrant, white bell-shaped blossoms changing to wine color with age. It may take 2 yrs. before it makes itself at home in the garden, but it's so dainty and sweet, I'm sure you will agree with those who so patiently waited, and say, "It's worth it." Plant 8 to 10 in. deep in partial shade, with good drainage.

	Each	6	12	25
6-8 in. cir. . . . .	\$ .50	\$2.60	\$5.00	\$ 9.50
8-10 in. cir. . . . .	.75	3.90	7.50	14.60

RUBESCENS. White passing to purple with age.

WASHINGTONIANUM (Mt. Hood). White changing to purple or wine color with age.

# Delightful "LITTLE COUSINS" of the Lilies

(Natives of Oregon and California)

In almost every state in the Union, you will find some of these flowers, growing in the fields and pastures, along streams in the valley, or woodland, and sometimes on a steep hillside. But just as the native western lilies differ from the natives of the eastern states, so do many of these "cousins" differ from yours. I wish I could send you a colored picture of each one. They are lovely—and such a variety of colors. Because of the great expense of handling these little bulbs, I would appreciate your ordering not less than 3 of any one variety, except where listed as "each". Write me if you wish larger quantities than I have quoted.

**BRODIAEA** (Broh-di-ee'-a)—Plant 4 inches deep, 4 to 6 inches apart, in well drained, partly shaded location in August or September. Dig as soon as ripe—air—store in paper bags in dry place.

**Coccinia** (Brevoortia Ida Maia)—A cluster of bright red, green tipped "fire-cracker" flowers. Very colorful and lasting. Blooms May-June.

**Laxa**—Clear blue tubular flowers on stems 18 inches tall. One of the best of this group.

**Capitata**—Early blooming variety of the "California Hyacinth" bearing a cluster of lilac colored flowers on 1 to 2 ft. stems.

**Ixioides**—Very handsome "Golden Star" with many flowers. The finest yellow Brodiaea.

**Lactea**—A cluster of milky white cup shaped flowers with green mid-vein.

BRODIAEA LAXA

3 bulbs of any one of the above varieties, 3 bulbs . . . . .	\$ .30
12 bulbs of any one of the above varieties, 12 bulbs . . . . .	1.00
3 bulbs of each variety listed, 15 bulbs . . . . .	1.40
12 bulbs of each variety listed, 60 bulbs . . . . .	5.50

# Trial Orders for Small Gardens

These Bulbs and Plants are all Wrapped and Labeled Separately.

## LILY COLLECTION No. 1

This is the best collection I have for an amateur's garden.

**\$2.65**

Postpaid

(15 Bulbs)

- 3 *Tenuifolium*—A gay little lily blooming in May.
- 3 *Regal*—White, requires little care and gets bigger and better each season.
- 3 *Willmottiae*—Adds color in midsummer.
- 2 *Tigrinum*—A fall bouquet.
- 2 *Pardalinum*—Orange shading to crimson.
- 2 *Dauricum Wilsonii*—Deep apricot spotted mahogany.

---

## LILY COLLECTION No. 2

Leave the choice of lily bulbs entirely to me, and I will give

\$5.00      Bulbs to the value of \$6.00 for.....\$ 5.00  
\$10.00      Bulbs to the value of \$11.50 for..... 10.00  
postpaid.

If you wish you may mark below your preference, and I will be guided by it as nearly as I can:

1. I prefer mostly white lilies;
2. I prefer mostly red lilies;
3. I prefer various colors.

---

## LILY COLLECTION No. 3

(Special)

**\$3.50**

Postpaid

(7 Bulbs)

2 each for \$6.75

- 1 *Auratum*.
- 1 *Formosanum Intermediate*.
- 1 *Hansonii*.
- 1 *Longiflorum Estate*.
- 1 *Martagon Album*.
- 1 *Shuksan*.
- 1 *Sunset*.

---

## HEMEROCALLIS COLLECTION

10 Hemerocallis of my own choosing.

These will all be nice, and labeled.

\$3.25—Postpaid.

---

## AN INTERESTING COLLECTION

(Special)

- 2 *Matilija*
- 2 *Hyacinthus plomosus*
- 2 *Hemerocallis citrina*
- 2 *Camassia*—white
- 2 *Camassia*—blue

\$3.25—Postpaid.

JULIA E. CLARK, Canby, Oregon.

**FRITILLARIA** (Frit-ill-ar'-ia)—

These bulbous plants of the west coast are to me the most fascinating of all. They are lovely in woodland or border, excellent for cutting either by themselves or with other flowers. But they do have a habit of resting for a year after flowering. The bulbs I shall send you I hope all will flower the first year, but if some of them do not, as I cannot tell for sure, please don't disturb them. Plant 3 to 4 inches apart, 3 inches deep, in woodland soil or the rock garden and do not disturb for many years. The Fritillaria should be planted early — we will ship in August.

**Lanceolata** — Green and brown, mottled prettily. Hardy, prefers woodland with a porous, well drained soil, fairly rich in leaf mold. 1½ to 3 feet high.

	Each	12	25
Large size . . . . .	\$ .15	\$1.50	\$2.80

**Liliacea** — White bell-shaped flowers are veined green and carried on 8 to 12 inch stems.

	Each	12	25
Large size . . . . .	\$ .18	\$1.80	\$3.45

**Pudica** — Nodding bell flowers of pure gold. Very hardy, a gem for the rock garden. 4-6 inches high.

	Each	12	25
Large size . . . . .	\$ .10	\$1.00	\$2.00

**Purdyi** — Waxy white large bell flowers, flecked scarlet. Very fine.

	Each	12	25
Large size . . . . .	\$ .20	\$2.00	\$3.85

**Recurva** — Orange-scarlet, throat flecked with yellow. This is considered one of the finest Fritillarias in existence. It prefers woodland with a porous, well drained soil fairly rich in leaf mold. Grows 1½ to 3 feet high.

	Each	12	25
Large size . . . . .	\$ .15	\$1.50	\$2.80

### Three Fritillaria Not Western Natives

**Camtschatcensis** — Often referred to as the Black Lily, this variety has deep wine-purple flowers. One foot tall. Native of Siberia and Alaska.

	Each	12
Flowering size . . . . .	\$ .30	\$3.00

**Pallidiflora** — Large pale yellow, bell-shaped flowers on stems 8 to 15 inches tall. A new introduction from Siberia.

	Each	12
Large size . . . . .	\$ .40	\$4.00

**Thunbergii** — The slender leaf with its curlycue on the end, together with its many "morning green" bell shaped flowers, gives Thunbergii such a sprightly appearance. Plant in woodland, leafy soil or partial shade in mass for best effect.

	3	12	25
Medium size . . . . .	\$ .35	\$1.30	\$2.50
Large size . . . . .	.45	1.65	3.20

FRITILLARIA THUNBERGII

**CALOCHORTUS VESTA**

**CALOCHORTUS** (Kal-o-kort'-us)  
(Mariposa lily or tulip) —  
Woodland plants. Thrive best  
in a loose abundant soil in leaf  
mold in sun or partial shade  
with SHARP DRAINAGE.  
Plant 2 to 3 inches deep, 4 to 8  
inches apart. Blooms April to  
June. We ship Sept. and Oct.  
only. Plant just before the  
ground starts to freeze. Rod-  
ents like them—plant in wire  
baskets. Dig as soon as ripe,  
store in paper bags in dry  
place.

**Albus** — Globular pure white  
flowers on branching stems 15  
inches tall.

**Amabilis** — Clear rich yellow, on  
branching stems 15 inches tall.

**Amoenus** — Soft rose-pink, grows  
8 inches tall.

**Citrinus** — Lemon yellow butter-  
fly blossoms with a central  
brown spot on the petals.

**Maweanus** — Dainty white open cup-shaped flowers, the base of which is purplish  
and covered with silky hairs. Grows 8 inches.

**Nitidus** — Very showy, one to three lilac flowers with an indigo blotch in the  
center of the petals. 12 inches tall.

**Vesta** — White, tinged lilac to pink and red at center. Flowers 3 to 5 inches  
across—very showy. Grows best in heavy soils, in full sun.

3 bulbs of each of foregoing Calochortus varieties—	21 bulbs.....	2.35
12 bulbs of each of foregoing Calochortus varieties—	84 bulbs.....	9.00

**Howellii** — Large white flowers covered with green hairs at the base. 12  
inches tall.

**Macrocarpus** — Large flowers of pale lavender, each petal green banded down  
the back.

**Nuttallii** — Beautiful white flowers tinged greenish yellow. Petals have a  
purplish band and yellow base.

**Clavatus** — The largest flowered and stoutest stemmed. Deep yellow flowers, 4  
inches across. A superb variety.

Each	12	25
\$ .25	\$2.50	\$4.85

**ERYTHRONIUM** (*Er-i-throh'-ni-um*) (Trout lily or Dogtooth violet)—Lovely little woodland plants, in delicate tints of cream, yellow, pink, white, lavender, and purple. Very hardy. They love a loose gritty soil, rich in leafmold, but also thrive in clays, grits and rock soils, and naturalize in great number in open meadows or woodlands of a moist shady position, if well drained. Some of these western species are 3 to 5 inches across with stems 4 to 6 inches, even 12 inches. Plant upon receipt of bulbs, in moist soil—don't let them dry out, it injures them. Set the bulb upright, 2 to 3 inches of soil covering the tip, 2 inches apart.

**Californicum**—Large cream colored flowers, leaves richly mottled.

**Californicum Bicolor**—White with chrome yellow center. The only fragrant variety and one of the easiest to grow.

**Citrinum**—Almost white shading to orange at center.

**Grandiflorum**—Bright buttercup-yellow.

**Giganteum**—Large cream yellow flowers and beautifully mottled foliage.

**Hendersonii**—Lovely light purple, center deep maroon, very striking.

**Revolutum, var. Johnsonii**—Exquisite rose-pink flowers—one of the prettiest.

**Tuolumnensis**—Golden yellow, quite distinct, form large clumps by off-setting.

**CALOCHORTUS ALBUS.** See opposite page.

## LILIES FROM SEED

Many lilies may be successfully grown from seed sown outdoors in well prepared beds. However, it is quicker and easier, especially with small lots, if the seed is sown in flats or ground beds in a cool greenhouse or frame. The easy germinating species are best sown in early spring and the slower kinds in the summer or early fall for germination the following spring. These slower sorts require a period of warmth followed by a period of cold before top growth will appear. Provide shade during the summer by the use of lath covers which may replace the cold frame sash during the summer months. One-half inch is sufficiently deep to sow the seed when protection is offered from heavy rains.

Seedlings of the easy kinds are best transplanted into nursery rows the spring following germination while those of the slow germinators should remain in the seed bed two years before transplanting. Seedlings may also be grown on in pots or plant bands in a greenhouse or frame. This method is desirable when handling the more tender sorts or those which, due to their rarity, should be given special attention. A light mulch of peat moss spread over the seed bed after germination will assist in keeping the soil surface evenly moist. Use care in transplanting so that the delicate young roots are not broken.

We offer these seed subject to crop. It might be well to make a second or even a third choice.

30 cents per packet—12 packets for \$3.00. Extra large packets, 50c each—12 for \$5.00.

## LILY SEED

The following species are slow germinating. Sow June to September for germination following spring or November to February for germination second spring.

Auratum	Humboldtii Magnificum	Parvum Luteum
Bolanderi	Kelloggii	Philadelphicum
Burbankii	Kulshan	Polyphyllum
Canadense	Marhan Hybrids	Pomponium
Chalcedonicum	Maritimum	Pyrenaicum Aureum
Columbianum var. Ingrami	Martagon	Roezlii
Cordatum	Martagon Album	Rubescens
Croceum	Martagon Cattaniae	Sacajawea
Cyrus Gates	Nevadense var. Shastensis	Shuksan
Dalhansonii	Oecidentale	Star of Oregon
Douglas Ingram	Pardalinum	Superbum
Giganteum Himalaicum	Pardalinum Giganteum	Washingtonianum var.
Grayi	Pardalinum Angustifolium	Purpureum
Guinea Gold	Parryi	

The following species are easy germinating. Sow March to June (top growth will appear within 3 to 8 weeks). Species marked \* are best handled in heated greenhouse or frame for first season.

Amabile	Edna Kean	Pryllis Cox
*Bakerianum	Fire King	Princeps G. C. Creelman
Brenda Watts	Formosanum (Early Type)	Princeps Shelburne Hybrid
Callosum	Formosanum (Intermediate Type)	Regale
Candidum Salonikae Variety	Formosanum (Late Type)	Regale (High Crown Type)
Centifolium	Grace Marshall	Scottiae Hybrids
Cernuum	Henryi	Sulphur-Gale Hybrids
Concolor	Lillian Cummings	T. A. Havemeyer
Creelman x Centifolium Hybrids	*Longiflorum Snowdrift	Tenuifolium
Crow's Hybrids	Lyla McCann	N. Thompsonianum
Dauricum	Maximowiczii	Umbellatum Chief Chinook
Dauricum var. Wilsonii	Maximowiczii Wadai	Umbellatum Mixed Varieties
Davidi	Maxwill	*Wallichianum
Davidi Macranthum	*Nepalense	Willerovidi Hybrids
Davidi Oriole	*Ochraceum	Willmottiae
Davmottiae	Philadelphicum Hybrids	Willmottiae var. Unicolor

Quantity of seed per packet varies with rarity of the species.

Note: Seed of Hybrid lilies does not come true.

## STEM BULLETS

We offer stem bulletts of the following lilies which normally are propagated in this manner. Delivery during August and September only.

L. Sulphureum, \$5.00 per 100.

L. Sargentiae, \$6.00 per 100.

L. Tigrinum Splendens, 75c per 100.

# MISCELLANEOUS BULBS and PLANTS

A pleasing and interesting addition to your garden.

**CAMASSIA** (Ka-mass'-si-a) **Leichtlinii**—Natives of Oregon. Hardy without protection and easy culture. Many flowers to a stem. Plant in early fall 3 to 6 inches deep, 6 to 10 inches apart. Best in rather heavy soil with abundant moisture in the early spring. We can give you these in either white or blue. Please state which you prefer.

	12	25	50	100
1 1/4 in. up cir.....	\$1.00	\$1.85	\$3.60	\$6.95

**CYCLAMEN Neopolitanum** (Hardy cyclamen)—This is a hardy species with pink flowers similar to the popular greenhouse plants. The broad foliage is beautifully marbled. Will succeed best in a well drained, moist, partly shaded situation and in a soil abundant in leaf mold or peat. Blooms during late summer and early fall. A gem for the shaded rockery. The small corms should be only barely covered with soil. Shipment during October, November and early spring.

Each	12
\$ .65	\$6.50

**CYCLAMEN Neopolitanum Album**—This is a white variety of the above and should have same treatment.

Each	12
\$ .75	\$7.50

**GALTONIA CANDICANS (Summer Hyacinth)** — Here is another bulbous flower for your July-August garden, among your lilies. The tall stem carries many pure white, bell-shaped flowers, and is very pleasing against a background of dark green foliage. Grows from 2 to 5 ft. Plant 6 in. deep, in sun or partial shade, and a rich, moist soil.

	6	12	25	100
Medium .....	\$1.10	\$1.90	\$3.40	\$12.40
Large .....	1.50	2.70	5.00	18.80

**HYACINTHUS PLUMOSUS (Plumed Hyacinth)**—Hyacinthus plumosus is just what the name implies, a plumed hyacinth, of a purple hue. Group them in some spot where you want something low-growing, particularly showy and different. Use them at the foot of your rock garden.

6	12	25
\$1.25	\$2.30	\$4.50

**IRIS RETICULATA**—A very early flowering bulbous iris which is an excellent plant for a well drained location in a rockery or terrace. The fragrant flowers are deep purple with a golden blotch, in form much like a miniature Dutch Iris, and are carried on 6-inch stems. May also be grown as a pot plant using 6 to 8 bulbs to a 5-inch pot. Plant 3 inches deep. August-October delivery.

Each	12
\$ .20	\$2.00

**IXIOLIRION LEDEBOURII**—An introduction from Central and Western Asia which blooms toward the end of May. The stems are 12 to 15 inches tall and bear umbels of deep blue tubular flowers. Excellent for cutting. Plant 3 to 4 inches deep during September or October in a sunny well drained location. Stock limited.

Each	12
\$ .15	\$1.50

**LYCORIS SQUAMIGERA (Hardy Amaryllis)** — This hardy and attractive amaryllis-like plant is becoming increasingly popular in American gardens and rightly so. The large bulbs produce their leaves in early spring and, as summer comes, these gradually mature and disappear. The flower stalk appears in August, 2 to 3 feet in height, bearing an umbel of large rosy purple flowers. Plant 6 to 8 inches deep in a well drained sunny location. October-November delivery.

6	12	25
\$4.50	\$8.70	\$17.00

**TRITOMA ("Towers of Gold")**—This is one of the "Torch Lilies", originated by Burbank. The rich YELLOW flowers bloom in August and early September when we need a good yellow in the garden and for cutting. Three of them will make a splendid addition to your garden. **Each 50c, 3 for \$1.25.**

**NOTHOLIRION THOMPSONIANUM** (Northwest Himalaya)—The flowers are funnel shaped and rose or lilac in color, carried on 2 to 3 foot stems. This is the easiest of the Notholirions to establish. May flowering. Plant in a sunny, well drained location and 3 to 4 inches deep. Produces top growth very early in the year which should have some protection during late winter and early spring. August-September delivery, not later than October. They start growing in the fall.

	6	12	25	100
Second size .....	\$1.80	\$3.30	\$6.20	\$23.60
Large, 1st size .....	2.50	4.70	9.00	34.80

**SCILLA CAMPANULATA (Spanish Squill)**—One of the most attractive May flowering bulbs with erect flower spikes and numerous hyacinth-like flowers. Will grow and multiply in any location even under fir and pine trees where few plants succeed. Plant in fall 3-4 inches deep. Oregon grown stock of this wood hyacinth in separate colors. KINDLY SPECIFY COLOR DESIRED.

	12	25	100
--	----	----	-----

**Alba Maxima**—White. First size .....

**Rose Queen**—Pink. First size (limited quantity) .....

**Excelsior**—Blue. First size .....

Second size .....

**Mixed** colors of pink, white and blue. First size .....

Second size .....

**SCILLA SIBERICA** is somewhat earlier flowering than Campanulata. The color is a very good deep blue. Culture and other requirements are the same as for Campanulata.

First size .....

Second size .....

**MUSCARI (Grape Hyacinth)**—One of the most attractive early flowering bulbs for borders or rock garden. The dark blue bell shaped flowers are carried on 6-inch stems during March and April. Of easy culture under average garden conditions and will produce large colonies if left undisturbed. Should be planted during early fall, 3 to 4 inches deep. I have excellent large bulbs which had 10 to 12 inch stems this year.

Large bulbs .....

Slightly smaller bulbs .....

**ACONITUM SPARKSI**—This is one of the best of the monkshoods—Aconitum napellus var. sparksii. It is really a very choice plant to grow among your lilies after the delphiniums are gone. The flowers are a very dark violet and bloom over a long period, growing from 3 to 5 ft. tall. Very attractive. I can give you selected roots, 40c each, 3 for \$1.00, 12 for \$3.60.

**TULIPA CLUSIANA**—A beautiful species tulip, often referred to as the Lady or Candlestick Tulip. The outer petals of these dainty flowers are cherry red, the inner petals creamy white with violet base. Plant 3 to 4 inches deep in full sun and a light well drained soil. Flowers in late April. Height 8 to 12 in.

	6	12	25	100
	\$1.30	\$2.30	\$4.20	\$15.60

**TULIPA EICHLERII**—Large, crimson-scarlet flowers with yellow and black center. Native of Turkestan. April flowering. Height 11 in.

	6	12	25	100
	\$1.40	\$2.40	\$4.25	\$16.50

**TULIPA MARJOLETTI**—Tall slender May-flowering species; pale yellow with base and edge of petals tinged red. Height 20 in.

	6	12	25	100
	\$1.35	\$2.35	\$4.25	\$16.00

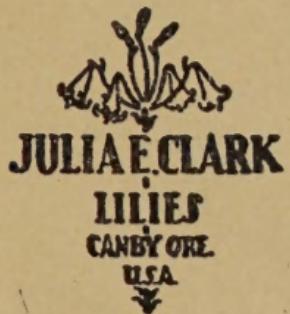

**TULIPA SYLVESTRIS (Florentina odorata)**—Beautiful sweet scented English species. Rich golden yellow. April flowering. Height 18 in.

	6	12	25	100
	\$1.00	\$1.85	\$3.25	\$12.25

Anyone interested in Mammoth Hybrid Amaryllis as a winter pot plant for the greenhouse or living room, please write me.

MISS JULIA E. CLARK

Route 1, Box 328

CANBY, OREGON

# H E M E R O C A L L I S

Hemerocallis has grown to be an essential in your perennial garden, and the many calls I have received warrants me in listing them again.

Even if you have poor soil, they will grow for you, and where you can give them better soil and water, they will reward you abundantly, whether in sun or shade. Leave them alone for six or eight years, spading around them to form a clump, and you will be delighted with them. I have excellent plants.

**APRICOT**—Light apricot-orange. Good for your rockery. Height 1-2 ft.  
Each 40c, 3 for \$1.00

**CRESSIDA**—Deep yellow—one of my favorites—blooms from early spring to fall.  
Each \$1.00, 3 for \$2.75

**GOLDEN DREAM**—Large, deep golden yellow. Very fine. Height 3 ft.  
Each \$1.00, 3 for \$2.75

**MIKADO**—Flowers deep yellow—central zone of each petal broadly blotched mahogany red.  
Each 70c, 3 for \$1.90

**BAY STATE**—Deep pure rich yellow—medium size.  
Each 45c, 3 for \$1.15

**FULVA ROSEA, CLON ROSALIND** (Stout)—Old rose shading to golden yellow center, on tall graceful stalks.  
Each \$3.00, 3 for \$7.50

**D. D. WYMAN**—Very large flower of golden yellow with a tawny splash across each petal.  
Each 50c, 3 for \$1.40

**THUNBERGII**—Light yellow, 2 to 3 ft.  
Each 35c, 3 for 85c

**MANDARIN**—Clear lemon yellow with greenish cast in the heart of each blossom. Wide open recurved type flower. Very tall.  
Each 75c, 3 for \$2.00

**FLAMID**—Rich orange-yellow with brownish reverse. Prolific bloomer.  
Each 75c, 3 for \$2.00

**CITRINA** (Stout)—Long, narrow tubular bloom, pale lemon yellow, true night blooming variety—fragrant.  
Each 75c, 3 for \$2.00

**MRS. A. H. AUSTIN**—Extra fine deep golden-orange, one of the very largest. very heavy texture. Midsummer. Lasting over a long period.  
Each 75c, 3 for \$2.00

**HYPERION**—Citron-yellow—very fine.  
Each 75c, 3 for \$2.00

## MATILIJJA

The scientific name of this plant is *Romneya Coulteri*. It grows 5 to 8 feet high, producing a continuous growth of numerous beautiful white flowers with orange center, 5 to 6 inches across, delicate, transparent and delightfully fragrant. It blooms from July until September, according to your season and location. Is a wonderful cut flower and is bothered by no particular pests or diseases.

Matilija starts its growth early underground, and if the new shoots are disturbed, it will destroy the plant. For this reason Matilija is shipped only in the fall.

This is a southern plant and although I am still receiving good reports as far north as Pennsylvania and New York, I suggest that where you mulch other perennials, you mulch this also. You will love it I know, and I should like for you to try it. Full planting and cultural directions will be sent with shipment.

Each \$1.00, 3 for \$2.00

If placed with an order of \$5.00 or more of other bulbs and plants

Each 75c, 3 for \$1.75

---

### OREGON GIANT PANSY SEED

Packet, 500 seed, \$1.00; 3 packets, 500 seed each, \$2.00.
